

Wastewater Upgrade - Coward Street,

Mascot

22 August 2023

We're upgrading a large wastewater pipe along Coward Street, Mascot.

This work will reduce wastewater overflows as well as protect public health and the environment.

Project timing

Start: Monday 28 August 2023

Finish: November 2023

Our work will be staged as follows:

28 August 2023

1

Set up site compound 1 and dig the entry pit in the roadway, near 151 Coward Street. This pit will be used to launch our tunnelling machine.

2

Next, set up site compound 2 on Coward Street near Linear Park.

3

We will then start welding and installing the new 380 metre length of pipe.

November 2023

4

The final stage of work is restoration of the roadway and all other impacted areas. Some of this will need to be done at night.

**dates may be affected by weather delays.*

See site compound layout and temporary traffic changes on the back page.

What you need to know

- **work hours:** Monday to Friday, 7 am to 6 pm. 8 am to 1 pm on Saturdays (only if required)
- **traffic changes:** partial lane closures, alternative routes and restricted parking
- **avoid the area and expect delays.** *Non-residents should avoid using Coward Street*
- **noise & vibration:** our work can be noisy, and drilling may cause intermittent vibration. Controls will be in place to reduce this as much as possible
- **night work:** some of this work will be done at night as permitted by Transport NSW. *No drilling will be done at night*
- this work will not interrupt your water or wastewater services.

Site set up will involves:

- **24/7 traffic control and safety equipment including safety fencing set up on the road**
- **parking will be temporarily restricted along Coward Street and Aloha Street for the duration of the project**
- **road closed to local traffic along Coward Street westbound from Botany Road**
- **westbound access is allowed for buses and emergency vehicles only**
- **detours will be in place for local traffic – non-residents should avoid the area and expect delays**
- you'll notice an increase in work vehicle and trucks during equipment, machinery and site amenities deliveries
- excavation of the road to establish entry pit into the wastewater pipe
- set up of the tunnelling machine over the entry pit.

Next, we will start setting up site compound 2 on Coward Street, adjacent to Linear Park.

Site compound 1: Corner of Coward Street and Aloha Street.
